GRAMMY Foundation Grants

With funding generously provided by The Recording Academy, the GRAMMY Foundation Grant Program awards grants each year to organizations and individuals to support efforts that advance the archiving and preservation of the music and recorded sound heritage of the Americas for future generations, and research projects related to the impact of music on the human condition.

Grant funds have been utilized to preserve private collections as well as materials at the Library of Congress, the Smithsonian and numerous colleges and universities. Research projects have studied the links between music and early childhood education, treatments for illnesses and injuries common to musicians, and the impact of music therapy on populations from infants to the elderly. More than $6 million in grants has been awarded to more than 300 recipients.
