Using Congress.gov to search for session laws since 1973. At the Congress.gov home page, click on Public Laws.
Notice that we are now only looking at legislation that Became Law. Under Congress on the left, click on Show More.
And that leads one to all of the session laws passed since 1973
One can then check as many years (Congresses) as one wants to find Public Laws from. Here we checked all.
Then we can still open up the **Subject – Policy Area** to find Public Laws passed on various subjects. Here it shows that there have been 299 Public Laws passed since 1973 in the subject area of **Health**.
Clicking on **Health** will display all of those 299 Public Laws. We can change the order of them to our liking. In this case we changed the order to **Latest Action – Newest to Oldest**.
